

Anesthetic Consent Form

Date _____ Reviewed by (staff member) _____

Owner _____

Pet _____ Age _____ Breed _____

All animals must be current on ALL vaccinations in order to stay at our facility.

Procedure(s) requested: _____

Phone number where you can be reached today _____

When did your animal eat last? _____

I am the owner or agent for the owner of the above animal and have the authority to execute this consent. I hereby authorize and give consent to sedate, anesthetize, treat and perform the above procedures.

Every effort will be made to accomplish these procedures, surgeries, or treatments without incident. However, I understand that no warranty or guarantee can be made as to the result or cure. I also understand that in any surgical or medical treatment risk of complications and even death exists, though the risk is usually minimal. Any estimate of fees provided is based upon our examination prior to anesthesia and does not cover additional procedures which may be required. I understand that during the described procedures, unforeseen complications may arise in which an estimate could not or cannot cover. Therefore, I hereby consent to and authorize the use of such anesthetics and the performance of procedures that are deemed necessary by the veterinarian in such situations. In cases where additional procedures are deemed necessary attempts will be made to contact the client prior to continuing.

I understand that professional and hospital staff personnel will be employed as deemed necessary by the veterinarian. I consent to and authorize the extraction or restoration of any teeth that are diseased or decayed.

Pre-Aesthetic Blood Testing

Blood chemistry tests give us an inside look at your pet's vital organs and let us know if they are functioning properly. Such tests are especially important before any kind of surgery. Our lab is fully equipped and staffed to perform these important tests and results will be available immediately to review before anesthesia.

Please check one of the following.

Full Profile + ECG (in house) \$184.04

This is good for any animal that has a history of heart problems or a heart murmur. A pet's organs will gradually deteriorate, and may lose their ability to function properly. Routine preventive testing for early detection allows us to help your pet live a longer, healthier, happier life. These tests give us a look at your pet's overall health status, from liver function, complete blood counts, to cholesterol levels and thyroid function.

Full Profile \$136.78

This is good for any animal. A pet's organs will gradually deteriorate, and may lose their ability to function properly. Routine preventive testing for early detection allows us to help your pet live a longer, healthier, happier life. These tests give us a look at your pet's overall health status, from liver function, complete blood counts, to cholesterol levels and thyroid function.

Minimal Pre-Blood \$50.72

This includes a complete blood cell count and a blood urea nitrogen level.

I do not want any blood chemistry tests performed.

By checking this option I understand the risk that my pet might have an underlying problem that is not evident on physical exam which could complicate anesthesia. The doctor reserves the right to refuse to do any surgery without any bloodwork being done.

Choice of Anesthesia

Isoflurane gas anesthesia is available for your pet. This type of anesthesia is inherently safer than other types. It is the anesthesia of choice for older patients; very nervous or scared patients; patients with pre-existing disease; and larger patients.

I authorize the use of isoflurane gas anesthesia (additional fee may apply).

I do not authorize the use of isoflurane gas anesthesia. (feline neuter and declaw only)

Optional Services

Nail Trim

- YES, I would like my animal's nails trimmed while he/she is asleep. \$8.50
- YES, I would like my animal's nails cut past the quick while he/she is asleep. This procedure is ideal for dogs whose nails are too long. A topical anesthetic is applied to prevent pain and stop the bleeding. (This procedure will not be performed without anesthesia.)
- NO, I do not want my animal's nails trimmed.

Microchip

HomeAgain[®] is a permanent microchip identification system designed to identify lost pets and reunite them with their owner. THIS INCLUDES REGISTRATION. \$49.99

- YES, I would like my animal to be microchipped today.

I have carefully read and understand this authorization and consent, and I have signed in agreement.
